

Architectural Consulting Service

Answer your biggest questions

The Architectural Consulting Service delivers research and recommendations from WordPress and technology experts to solve complex integration, implementation, and optimization challenges. Each engagement is designed to accelerate success on the VIP Platform and guide you through sophisticated product and technical decisions toward positive business outcomes.

Identify Opportunities

We'll help you plan new approaches to WordPress application architecture and third-party integrations with a wide range of tactics. Restructure your codebase to accommodate business growth, use advanced syndication methods, build in governance.

Deep Discovery

This service starts with a research and discovery period to gather all the necessary information from your team, stakeholders, partners, and vendors. We'll work with you to identify, scope, and measure your biggest challenges and opportunities.

Detailed Analysis

WordPress VIP will provide a technical report with in-depth details tied to our recommendations. Gain insights into which engineering, technological, and business solutions make the most sense for your organization based on data from our engineering and services teams.

Actionable Recommendations

Our recommendations will take into account your current configuration on the platform, their team or partner's engineering expertise, existing third-party relationships and integrations, resulting in a focused plan that optimizes for your real-world requirements and goals.
